Laundry stains	Plastic	Dust repellent
Rubber	Marble	Picture frames
Algae	Seatbelt stains	Silver
Tree sap	Rubber moulding	Gold
Glycol	Light oil on cement	Ski goggles
Industrial fallout	Kitchen grease	Scuba goggles
Engine degreasing	Vinyl siding	Light car wash
Heavy carpet stains	Bugs on car	Pool table
Exhaust stains		
Nicotine removal		
Heavy smoke damage		

**Enviro-Orange** is of the highest quality and economically can reduce your business and household expenses up to 50% over annual maintenance costs. Although there are thousands of other products in the marketplace, only **Enviro-Orange** has formulated a product that can be so versatile and economical to use.

Whether the job is carpets, carbon build-up, rust, grease, glass or paint oxidation, **Enviro-Orange** is on the top in every application. So why use fifty different products when Enviro-Orange can accomplish the problem economically and effectively?

Our marketing surveys have shown that the average family of four spends approximately \$398 annually on cleaning products. **Enviro-Orange** will cut those expenses by over 50% and **Enviro-Orange** guarantees it!

## **APPLICATIONS**

Use **Enviro-Orange** for all of your cleaning needs, from home use to industrial applications. It can be used in many ways. In solution, it can be applied with a spray bottle, while in other applications it can be used in dipping tanks.

**Enviro-Orange's** lifting agent, a blend of d-Limonene and sodium metasilicate, gets into the pores of a material to lift and remove anything which is not permanently bonded. Some stains contains permanent dyes, which **Enviro-Orange** may not be able to remove (such as some juice stains or permanent marker). However, repeated applications and some scrubbing may remove those as well.

## HOW TO USE

**Enviro-Orange** can replace virtually all general purpose cleaning products. Use a 30:1 dilution for most applications; a 10:1 dilution for tougher jobs.

### CARPETING & UPHOLSTERY

**Enviro-Orange** can be used to remove wine, grease, blood and virtually everything except dyes from carpet and upholstery. Using a 30-1 dilution (or 10-1 for heavy spotting), spray and soak the stain. Work **Enviro-Orange** into the fibers by agitating the surface with a stiff brush. Rinse by pouring hot water onto the stain and dry with a towel.

**Enviro-Orange** can also be used in a carpet shampooer with incredible results. First vacuum the entire carpet, then remove all heavy stains as described above. Use a 50 - 1 dilution in the holding tank of the shampooer. Shampoo the entire carpet, focussing on high traffic areas. Remove excess moisture from carpet with towels, or allow to air dry.

- **Gum on carpet:** Heat a 10:1 dilution in the microwave for 45-55 seconds (careful, it will be hot!). Pour the heated **Enviro-Orange** onto the gum and watch it dissolve!

### LAUNDRY

**Enviro-Orange** can be used as a pre-spray on clothing - including your white socks! They remove virtually every stain, including ring-around-the-collar, cuffs, make-up, lipstick, blood, wine, and grease. Using a 30-1 solution, spray all stains, making sure the area is well-saturated. Bad stains should be agitated with a stiff brush or the bottle trigger.

### WINDOWS, MIRRORS & GLASS

Use a 120:1 dilution of **Enviro-Orange** for all your windows, mirrors, and glass. (A stronger dilution will streak.)

To remove scotch tape from glass, mist the area with a 10:1 dilution, then cover with a paper towel soaked with a 10:1 dilution. Remove after 20 minutes, and use a clean towel to wipe off the tape and adhesive.

## KITCHEN

### **GLASS WASHING MACHINES**

Enviro-Orange is excellent for use in glasswashing equipment in restaurants, bars, lounges, hospitals, hotels, etc. Use a 20:1 mixture of Enviro-Orange to replace the cleaning and rinsing chemicals. If you use a sanitizer chemical as a last step, continue to do so. Using Enviro-Orange will give you a savings of about \$100.00 every time you change the pail. Your sales rep can calculate your exact savings.

### **MILDEW, CALCIUM AND HARD WATER**

Apply a 10:1 solution to the area, and leave it for 10 to 20 minutes. Use a stiff brush or non-abrasive pad to remove the build-up.

### **Ovens**

Pre-heat your oven, and then spray a 10:1 dilution of Enviro-Orange onto the areas to be cleaned. After letting it sit for 15 minutes, use a non-abrasive scrub pad to help break up the built up grease. Use a towel to wipe up.

### **STAINLESS STEEL**

Use a 10:1 dilution to clean your stainless steel. For best results work with the grain. Use a 120:1 dilution to finish, then buff with a clean, dry cloth.

## VEHICLES

### **ENGINE DEGREASER**

Spray and soak the entire engine and hoses (make sure they're hot from driving or idling) with a 7:1 solution of **Enviro-Orange**. Let the degreaser sit for 15 minutes. then rinse off the engine and compartment with a garden hose.

### **TIRES AND WHITEWALLS**

Spray and soak all tires with a 10:1 dilution of **Enviro-Orange**. Use a stiff brush or sponge to scrub the tires. **Enviro-Orange** will remove brake dust, dead rubber, road grime and help restore your tires to their original condition.

### **CAR INTERIORS**

- 10:1 dilution: carpet, mat, or upholstery stains.
- 30:1 dilution: dash, doors, vinyl, leather, seat belts and door jambs
- 50:1 dilution: carpet shampooer or steam cleaner
- 120:1 dilution: glass and mirrors, as well as car wash

## **BATHROOM AND SHOWER**

Use a 10:1 dilution for all heavy duty bathroom and shower cleaning. To clean shower tiles, leave Enviro-Orange on for 10 to 15 minutes. Use a non-abrasive scouring pad to help take off heavy mildew or soap scum. A clean dry bath towel should be used to buff surfaces dry. A light protective coat is left on tiles to help sheen water off.

## **JEWELLERY**

Add a capful of Enviro-Orange to a large glass of hot water, and let your rings, necklaces, chains, bracelets and waterproof watches soak for 10 to 15 minutes. Stir occasionally. Buff your jewellery dry with a clean, dry towel.

## **PRESSURE WASHERS**

**Enviro-Orange** works great in all pressure washers and steam cleaners. Since it is 100% water soluble, it won't clog nozzles and machines. Use at a 120:1 dilution. Hot water will always give better results than cold.

## **SHOP FLOORS AND WALLS**

**Enviro-Orange** replaces varsol, carb cleaner, WD-40 and other poisonous cleaners which can get into your ground water. For floors put 1 litre into a 20 litre pail of hot water. Stir and splash onto your floor. Use a stiff broom to work the cleaner into your floor. Rinse with water. To remove carbon or grease off shop walls, spray and soak a wall with a 10:1 dilution. Let it sit for 10 to 15 minutes. Use a broom or brush for heavy build-up. Use a pressure washer or garden hose to rinse.

## **PAINT OXIDATION AND OVERSPRAY**

To remove paint oxidation and overspray use a 7:1 dilution of **Enviro-Orange**. Spray a section and let it sit for 5 to 10 minutes. Use a clean, dry towel to wipe and buff in a circular motion, restoring the paint to its natural lustre.

## **AUTOBODY SHOPS**

Spray with a 30:1 solution to remove silicone. Use a towel to buff in a circular motion. For wax and grease removal, use a 30:1 solution in a bucket to hand wash. To remove all traces of grease, oil and dirt, use a 30:1 dilution. Spray evenly, let it sit for 30 seconds then wipe clean and dry with a clean towel or cloth.

## BOATS & SHIPS

A 10:1 dilution will remove algae, other build-up, or faded paint. Spray evenly and let it sit for 10 minutes before wiping with an old bath towel. Use a 10:1 solution to clean tarps, awnings, canvas and boat covers. Spray evenly and work it in with a stiff brush. Use a garden hose or pail to rinse. Boat motors can be degreased and kept clean with a 10:1 dilution. Bilge, engines, decks, rust removal and degreasing can all be done with a 10:1 dilution and a brush. Since **Enviro-Orange** is biodegradable, it can be rinsed into the ocean, without affecting the environment. **Enviro-Orange** can also be diluted with sea water.

## AIRCRAFT

Aircraft can be maintained both inside and out with **Enviro-Orange**. Use 10:1 for heavy duty applications such as removal of glycol, carbon, grease etc. The interior of aircraft can be maintained with 10:1, 30:1 and 120:1 dilutions, depending on the application (please refer to the dilution guide).

## R.V'S

Recreation Vehicles can be kept in spotless condition with **Enviro-Orange**. Use a 10:1 dilution to remove the black streaks that run down from windows, and to remove heavy build-up.

## FARMS AND RANCHES

**Enviro-Orange** helps farmers and ranchers get their maintenance work done quickly, safely and inexpensively. Dairy farmers use it to keep their stainless steel equipment sparkling clean. Heavy machinery, vehicles and equipment can all be degreased and kept clean by **Enviro-Orange**, without poisoning farmland.

## SAWMILLS

Tree sap or pitch can be removed from saw blades with a 10:1 dilution. Spray down the blade, give it a few minutes to loosen up and then wipe it clean with a non-abrasive scrubbing pad. Some sawmills will soak their blades in a pail or drum solution of 30:1 dilution overnight, for an easy clean-up the next morning. Use a 10:1 or 30:1 solution to keep equipment free of carbide and carbon filings. Spray the equipment, let it sit for a minute or two and wipe it clean.
